SUBJECT: PUBLIC WORKSHOP TO DISCUSS DEVELOPING A REGULATION
FOR PRIVATE FLEETS OF ON-ROAD HEAVY-DUTY DIESEL-FUELED
VEHICLES

The California Air Resources Board (ARB or the Board) staff invites you to participate in a series of public workshops to discuss developing a control measure to reduce diesel particulate matter (PM) and oxides of nitrogen (NOx) emissions from private fleets of on-road heavy-duty diesel-fueled vehicles. This measure includes, but is not limited to, long and short haul truck-tractors, construction related trucks, port hauling trucks, wholesale and retail goods transport trucks, tanker trucks, package and household goods transport trucks, and any other diesel-powered trucks with a gross vehicle weight rating of 14,000 pounds or greater. This control measure will not apply to heavy-duty vehicles covered by ARB's Solid Waste Collection Vehicles control measure or the On-Road Heavy-Duty Municipality and Utility Owned Truck control measure.

At the workshops, we will discuss a proposed regulatory concept and updated inventory and fleet information. The workshops will be held in Sacramento and El Monte at the dates and times listed below:
